***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Visotsky (6175588).

Visotsky shows a method for determining the quality in a mobile communication system that includes the steps of estimating the SNR of a traffic channel from PCB bits of a frame (since it uses the entire traffic channel frame to estimate the SNR of the traffic channel) and a signal received through the pilot channel. See col. 13 lines 30-45, col. 14 lines 53+ and col. 16 lines 27-37.

Visotsky also includes the step of comparing the determine SNR with a known SNR for the device to determine quality of the signals.

2. Claims 2-7,9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
